

## Workshop: Digital Preservation Sustainability on the EU Level

### The venue:

1. The panel session and elevator pitches will be in one room, and the stalls in another. We therefore urge you to be at the venue at least **one hour prior to workshop start** (i.e. 12:00) to set up your stall.
2. Only normal height 1X1m tables will be available. A stall will be made up of 2 tables.
3. There will be no poster boards available - we will have to use the walls behind the stalls for posters (we will bring extra **white tack** - blue tack is not allowed!)
4. Please bring extra **power cords** if you have much digital equipment - there won't be that many available at the university. And remember **adapters** for UK wall sockets.
5. No projectors are available for the stalls – if you need one, you will have to bring it yourself. White walls can be used for projection.

### Panel session

In the opening panel session three experts from SCAPE, APARSEN and OPF will discuss the current status of Digital Preservation Sustainability on EU policy level, with real time visualization of the discussion by Elco van Staveren:

Focus points in the panel session will be:

- Where are we now, after 15 some years of Digital Preservation and a lot of EU DP projects?
- The time has come to choose how to sustain project outcomes. How do the various initiatives fit into this picture?
- Which message do we want to send to the EU for the future of Digital Preservation projects?

### 1 minute elevator pitch

Between the panel session and the stalls and clinic session there will be a 1 minute elevator pitch at which you can present your project on one slide.

### Stalls and clinic session:

#### Stalls

Each project will have a stall at which you can present your project. A poster (size A1) can be projected on the wall behind the table or you can bring a roll-up poster if you prefer that.

The stall should focus on the project results and the sustainability of these results.

It would be great if you also incorporate suggestions for what can be expected from the EU in relation to digital preservation.

### *Clinic*

Next to the project stalls we have the central clinic – a special table which will be manned in turn with experts from the different projects. At this table the visitors can ask specific DP and sustainability questions not necessarily related to one specific project, but to a specific topic/ expertise of the ‘doctors’. Think of topics like auditing, web archiving, policies, metadata etc.

Each project can send an expert to the table for 15 minutes to answer questions related to a specific topic on which this person is an expert.

### **What you need to prepare now:**

- Send 1 slide (ppt) before 29 September 2014 about your project for elevator pitch
- Send name of presenter of elevator pitch
- Suggest expert and topic for clinic session

All of this should be sent to [jgj@statsbiblioteket.dk](mailto:jgj@statsbiblioteket.dk) as soon as possible so that we can finalise the timetable for the clinic and set up the elevator pitch slides.

The Twitter hashtag for the workshop will be #DPSustainability - please use this in all workshop related tweets to promote the workshop.

Please notice that there will also be a **Twitter competition**. Read more about the competition [here](#).

If you still haven't registered for the workshop, please do so immediately. You should not register for this workshop via the DL website, since this workshop is free! Please register via Eventbrite, <http://bit.ly/DPSustainability>.

If you have any further questions, please don't hesitate to contact us.

Best regards,

Daria Sas, [daria.sas@ltu.se](mailto:daria.sas@ltu.se) (APARSEN)
